## **EXPERIENCE**

**Plenary Applications Manager -Stefanini (Banco de Occidente).**

**21 - 02- 2022 - Currently**

**Implementation of the CRM SIEBEL project:**

Giving stability in test environment and later to production, developed with JAVA and BD Oracle technology.

**Support:**

Giving support to Banco de Occidente users, managing users, roles and permissions, parameterizing rules, configuring the application and managing errors.

**Developments:**

Developing solutions such as:

SQL script, for searching, updating and creating data with Oracle technologies.

Shell, for updating system data.

**Log:**

Log review to see the affectations and errors of the processes.

**Plenary Applications Manager -Stefanini (Seguros Alfa).**

**17 -06- 2021 / 19 -02-2022**

**Implementation of the ARPIS project:**

Giving stability in test environment and later to production, developed with JAVA and BD Oracle technology.

**Support:**

Giving support to the users of the Alfa Insurance company, Managing system improvements and errors.

**Log:**

Log review to see the affectations and errors of the processes.

**Developments:**

Developing solutions such as:

SQL script, for searching, updating and creating data with Oracle technologies.

**Front End Developer (Freelance).**

**2018 – Currently**

Development of web solutions for different companies and clients, with technologies such as HTML, CSS, Javascript, React, SASS, Bootstrap, PHP and BD MY SQL server.

Gathering information.  
Documentation.

Developing.

Web solutions, Pages, Components, Games.

Maintenance.

Updates, Improvements.

**Digital solutions engineer -Comfenalco.**

**23 – 04 -2015 – 16 -06- 2021**

Implementation of projects with technologies such as PHP, JAVA, React, HTML, CSS, Giving stability in the test environment and later in production.

**Support:**

Giving internal support to more than 10 applications of the Box, Managing improvements and system errors.

**Log:**

Log review to see the affectations and errors of the processes.

**Developments:**

Developing solutions such as:

SQL script, for searching, updating and creating data with Oracle technologies. Oracle

Script, for searching, updating and creating data with Oracle technologies.

Solution to visualize the cases of the technology area. Developed in php / React.
